Bootstrap	.net MVC Core	Mongodb	Chatgpt	Odoo
React Js	Flutter Dart		Deepseek	Github
Vue Js	Node Js		Gemini	Api
Angular Js	Python Django		API handling	ChatBots

PROFESSIONAL EXPERIENCE

MIMSOFT PVT. LTD.   Jul 2025 - Dec 2025

Full Stack Codiegnator & Laravel Php Mysql VueJs Developer

Developed and Maintained ERP System for Nova Engineering Company (Dubai)
🌐 **www.novaengg.ae** | 🔗 **nova.mimcamp.com**

Built and maintained a comprehensive ERP system for Nova Engineering Company, a leading engineering and construction firm in Dubai. The system manages all major operations, including HR, Payroll, Attendance, Camps, Fleet, Fuel & Distance Tracking, Carbon Emission, Sales, Vendor, and Finance.
Integrated with a mobile application for real-time field data and management access. The ERP provides advanced reporting and data visualization, improving efficiency, transparency, and decision-making across the organization.

Developed Billing Automation System — EazyBill
🔗 **eazybill.mimsoft.pk**

Developed a fully automated Billing System using CodeIgniter 4 and MySQL, designed to streamline monthly billing operations. The system automatically generates recurring invoices based on defined billing durations, applies taxes and discounts, and sends bills and receipts via an integrated email system (with To, CC, BCC support).
Companies can upload letterheads and email templates, manage customers, and maintain complete voucher, receipt, and ledger records — all handled through a centralized dashboard.
This automation significantly reduced manual workload and improved billing accuracy and communication efficiency.

Contract Base Freelance Projects
Full Stack Php & Mysql Applications

Developed Gym Management Platform
Designed and implemented a Gym Management solution for a freelance client, enabling multi-gym administration, member **attendance tracking**, and **automated monthly fee generation**.
The platform features **advanced reporting dashboards** with **interactive charts**, providing real-time insights into **memberships**, revenue, and gym performance. Built with a focus on scalability, automation, and data visualization to support multiple clients under a single system.

Developed Multi-Vendor E-Commerce Platform — Agmoo
🔗 **agmoo.com**
Developed a fully dynamic Multi-Vendor E-Commerce Platform similar to **Alibaba**, allowing multiple sellers to register, **bulk upload products**, manage orders, and track their performance.
The admin panel provides complete control over the platform, including product approvals, rejections, cancellations, and full content management — such as sliders, posters, footers, web logos, and links — all dynamically configurable.
Built to support scalability and vendor automation, enabling seamless interaction between sellers, customers, and administrators.

Automation & AI Workflow Engineer (n8n)

Developed an AI-powered WhatsApp order & inventory automation system using n8n.
Built an intelligent bot that processes customer orders, checks real-time inventory from Google Sheets, auto-validates products, records orders, and sends instant confirmations.
Reduced manual work by *90%* and designed a scalable solution for restaurants & small businesses.
Tech Stack: n8n, WhatsApp API, LLM (AI Agent), Google Sheets API, Webhooks

EDUCATION

Intermediate In Computer Science   **Aug 2023 - Sep 2025**
- Pass From 79.40%

Software Engineering Diploma Aptech Higher Education   **Dec 2022 - Dec 2025**
- Advance Diploma In Software Engineering
- Successfully completed all six semesters with strong academic performance (92%).
- Developed and delivered practical software projects in every semester, gaining hands-on experience in full-stack development and software design.
